

Claims

1. A wall mounting for detachably mounting a shower head having
 - 1.1 a holder for the shower head (8) that
 - 1.2 is configured for engaging a location on the housing of the shower head (8) provided for the purpose of mounting the latter that is unrecognizable as such and
 - 1.3 acts by means of an interference fit along the withdrawal and introduction directions.
2. A wall mounting according to claim 1, wherein the holder is configured for engaging a location on the housing of the shower head (8) provided for the purpose that is unrecognizable as such, based on its shape.
3. A wall mounting according to claim 1 or claim 2, wherein the holder is configured for gripping the outer perimeter of the housing of the shower head (8).
4. A wall mounting according to any of the foregoing claims, wherein the shower head (8) remains operational when withdrawn from the mount.
5. A wall mounting according to any of the foregoing claims, wherein the holder for the shower head (8) engages two diametrically opposed locations on the housing of the shower head (8).
6. A wall mounting according to any of the foregoing claims, wherein the holder for the shower head (8) has a pair of jaws (14) for gripping the housing of the shower head (8).
7. A wall mounting according to claim 6, wherein the jaws (14) are drawn toward one another when the shower head (8) is in place therein.

8. A wall mounting according to claim 6 or claim 7, wherein the pair of jaws (14) are joined to the holder for the shower head (8) by a component (15) that is under tension.
9. A wall mounting according to claim 8, wherein the tensioning component (15) is configured such that it contacts the housing of the shower head (8) over an extended area.
10. A wall mounting according to claim 8, wherein the tensioning component (15) is configured such that does not contact the housing of the shower head (8) at any location thereon.
11. A wall mounting according to any of the foregoing claims, wherein the holder for the shower head (8) is arranged between tines (11) of a fork.
12. A wall mounting according to any of the foregoing claims, wherein the holder for the shower head (8) is arranged in the vicinity of the far end of an arm that does not constitute a fork and is mounted on a wall.
13. A wall mounting according to any of the foregoing claims, wherein the shower head (8) is configured in the form of a hand-held shower head having a grip attached to its housing.
14. A wall mounting according to any of the foregoing claims, wherein the housing of the shower head is disk-shaped.
